PROFILE SUMMARY

Software Engineer with 8+ years of experience designing, developing, and scaling Java full-stack applications and distributed systems across geospatial, fintech, and ad-tech domains. Proficient in Java, Spring Boot, React, TypeScript, and AWS, with practical experience in system architecture, enterprise application modernization, and high-volume data processing. Sole-owned the architecture, development, integration, and testing of a complex legacy application modernization. Experienced in technical design reviews, mentoring junior engineers, and delivering end-to-end engineering solutions.

TECHNICAL SKILLS

Languages: Java, Apex, TypeScript, JavaScript, SQL

Core Competencies: Data Structures and Algorithms (DSA), System Design, Object-Oriented Design (OOD), Distributed Systems

Backend: Spring Boot, Hibernate, REST APIs, Microservices, Kafka, Redis

Frontend: React, Angular, HTML, CSS

Cloud & Infrastructure: AWS (EC2, ECS, Lambda, S3, ELB), Docker, Kubernetes (basic)

Databases: MySQL, MongoDB, Hive

Testing & Developer Tools: JUnit, Git, Jenkins, CI/CD, Maven, Grafana, GitHub Co-pilot

WORK EXPERIENCE

Here Technologies | Mumbai, Maharashtra, India

Software Engineer II – Full Stack | *Feb 2024 – Present*

- Sole-owned the end-to-end modernization of HERE's Enterprise Geographic Information System (EGIS), a legacy Maven/GWT application with multiple modules, to React, TypeScript, and Spring Boot within 3 months, independently driving architecture design, development, integration, and testing, with a target of reducing infrastructure costs by 50% upon production deployment.
- Owned frontend development of an internal imagery dashboard used by 2,000–3,000+ employees to monitor millions of crowdsourced images uploaded daily.
- Developed Java and Kafka-based backend services for high-volume geospatial data ingestion, decoupling producers and consumers to improve system reliability.
- Contributed to technical design reviews for migration strategies and API contracts, evaluating architectural alternatives, implementation approaches, maintainability, and engineering costs.
- Mentored junior engineers through technical guidance, code reviews, and knowledge sharing to support engineering development and code quality.
- Identified and decommissioned an unused AWS Classic Load Balancer while investigating deployments across EC2, ECS, S3, and Lambda, eliminating unnecessary infrastructure costs.

RIA Advisory LLP | Mumbai, Maharashtra, India

Software Engineer – Java | *Jan 2022 – Jan 2024*

- Developed object-oriented Apex (Java-like) business logic, validations, and integrations for Terafina's digital account opening platform, supporting onboarding for multiple U.S. banks including First State Bank, Lincoln Savings Bank, SouthState Bank, and People's Savings Bank.
- Engineered bank-specific onboarding workflows using Salesforce Apex and Angular, implementing customized business rules to improve the end-to-end customer onboarding experience.

- Investigated and resolved production issues across frontend and backend components, improving reliability while preserving client-specific functionality.
- Contributed to design and cross-functional code reviews, evaluating implementation approaches, maintainability, and adherence to engineering standards.
- Mentored junior engineers on application architecture and banking onboarding workflows.

Itiviti (Broadridge) | Mumbai, Maharashtra, India
Software Engineer – Full Stack | *Jul 2021 – Dec 2021*

- Developed Java and Angular onboarding workflow features for FIX Conductor, Itiviti's FIX counterparty certification and onboarding platform, supporting Goldman Sachs' trading operations.
- Collaborated with cross-functional engineering teams to deliver and troubleshoot features in a financial trading environment, meeting performance, compliance, and code-quality requirements.
- Guided junior engineers on development best practices.

Media.net | Mumbai, Maharashtra, India
Software Engineer – Product Engineering | *Aug 2018 – Jun 2021*

- Developed Java and JavaScript components for real-time bidding (RTB) solutions across Content Monetization, Header Bidding, and Prebid platforms, supporting programmatic advertising workflows.
- Served as the technical point of contact for Demand-Side Platform (DSP), Supply-Side Platform (SSP), and RTB integrations, working with business teams to resolve integration issues.
- Ran A/B and AABB experiments on ad formats and bidding strategies, using MySQL and an in-house Hive-based analytics tool to analyze performance and find revenue optimization opportunities.
- Investigated and resolved ad-serving issues across HTML, CSS, JavaScript, and backend integrations, using Google Ad Manager for reporting and troubleshooting.
- Partnered with Product Managers on product enhancements and feature rollouts, translating technical changes into guidance for business teams across locations.
- Mentored junior engineers and conducted technical interviews for Data Analyst and Product Operations Analyst roles.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering | 2014 – 2018
University of Mumbai | Mumbai, Maharashtra, India

PG Diploma in Advanced Computing | Sep 2020 – Apr 2021
C-DAC ACTS | Pune, Maharashtra, India

CODING PROFILES

LeetCode: 1,400+ problems solved (Java)
Profile: https://leetcode.com/u/gaikwadapurva65/

CERTIFICATIONS

CodeChef Certification in Data Structures & Algorithms (Foundation Level)
Credential: https://www.codechef.com/certificates/public/eb2b13c
